EYE GLASS CARE INSTRUCTIONS

Please follow the instructions for the proper care of your glasses.

1. Always use an appropriate lens cleaning solution and cloth to clean your lenses. Never use paper towel or tissue or wipe your lenses when they are dry as even dust can cause scratches.
2. Screws tend to become loose over time and need to be tightened to prevent loss of lenses and/or temples. Please check your screws often.
3. Never attempt to adjust your eyeglass frame yourself, bring it to an eye care professional for any adjustments. You may break or damage your

4. When you are not wearing your glasses make sure to put them in the case provided. Never set glasses down on tables, chairs, counters etc as they may become damaged or scratched.
5. Never wear your glasses on your head or carry them in your pocket unless they are in the case.
6. Never share eyeglasses. Every one has a different prescription and pupillary distance therefore, your glasses are made specifically for you and will not work proper-

Vision is one of the most important senses.

Take good care of it by taking good care of your eyeglasses.

Warranty/Benefits
